EDUCATION

Institute of Technical Education and Research (ITER)

Bachelor of Technology in Engineering; CGPA: 7.84

Bhubaneswar, India

Expected Graduation: 2027

C P Chaudhary Inter College | Class XII (JAC); Percentage: 72.83%

2023

St. Ann's School | Class X (ICSE); Percentage: 87.83%

2021

SKILLS

Languages: C/C++, SQL, Java, Python, HTML/CSS

Core CS Subjects: Operating Systems, Database Management Systems (DBMS), Computer Networks (CN)

Core Competencies: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Low-Latency System Design

Developer Tools: Git, Linux, VS Code, Winsock2

PROJECTS

Limit Order Book Matching Engine | C++

Jun 2025 – Aug 2025

- Architected a high-frequency matching engine utilizing a Limit Order Book model for low-latency trade execution.
- Optimized data structures and memory access patterns to achieve a peak processing throughput of 14.2 million orders per second.
- Leveraged advanced C++ features to minimize execution delay and ensure robust, high-performance infrastructure.

Custom HTTP Web Server | C++, Winsock2

Jun 2025 – Aug 2025

- Built a single-threaded HTTP web server from scratch leveraging the Winsock2 API to process client requests.
- Engineered the network application to accurately serve standard HTML documents alongside raw binary content.
- Designed a multithreaded architecture foundation to handle concurrent client connections and boost overall throughput.

Graph-Based Task Scheduler | C++, STL

Feb 2026 – Mar 2026

- Developed a command-line scheduling engine utilizing Directed Acyclic Graphs (DAGs) to model complex task dependencies.
- Implemented Kahn's Algorithm for Topological Sorting to efficiently detect scheduling conflicts and compute optimal execution order.
- Leveraged C++ Standard Template Library (`unordered_map`, `queues`) to optimize graph construction and node traversal speeds.

ACHIEVEMENTS

- Competitive Programming :** Solved over 900 complex Data Structures and Algorithms (DSA) problems, heavily utilizing C++ and the Standard Template Library (STL).
- Platform Ratings:** Achieved a rating of 1700 on [LeetCode](https://leetcode.com/), attained Pupil rank on [Codeforces](https://codeforces.com/), and reached a 1550 rating on [CodeChef](https://www.codechef.com/).
